

I am concerned about this move to replace FM translators with LPFM stations. I listen to a station that is based in Sacramento and appreciate the message and music that KLOVE provides. There is not a local station that provides the same music and clean content -- as well as no commercials.

I feel that the music and message of KLOVE is an imperative option in this community and it would be a disservice to take that option away. We don't all appreciate the current music and news options that are available on other stations and I'd be forced to return to tapes and CDs for most of my music and information.

Thank you for your interest and concern with this issue.
